Take full control of your gameplay with this high-performance wireless game controller, featuring a dedicated C-button for Switch 2 that provides quick access to chat functions and enhanced in-game communication. Designed for precision, comfort, and customization, this controller combines advanced technology with responsive controls to give you the edge in every match.

Equipped with Hall Effect sensors on the joysticks, the controller delivers smooth and highly accurate movement while reducing the risk of stick drift. The high-precision 3D joysticks and 6-axis motion sensors ensure responsive control whether you're racing, aiming, or exploring dynamic game environments.

The controller also features adjustable RGB lighting, allowing you to customize the look of your setup. With 2 programmable macro buttons, you can assign advanced commands and shortcuts to gain faster access to your most important actions.

Two integrated vibration motors provide immersive feedback during gameplay, while the turbo button gives you rapid input when you need it most.

Thanks to Bluetooth 5.3 connectivity, you get stable wireless performance with a range of up to 10 meters, making it perfect for both console and PC gaming.
